

Aquacon II Water Conditioner

Prisco

K-Supply

K-Supply Aquacon II Water Conditioner is a neutral pH "rehardening" additive to adjust the alkalinity of water produced by a reverse osmosis system (i.e. RO water) before mixing with a fountain concentrate. This treated water provides a consistent starting point for fountain solution preparation that facilitates an optimum offset printing performance.

Benefits

- Reduces corrosive properties of RO water.
- Stable and consistent water hardness.
- Restores a neutral pH value to water.
- Use plastic pumps only.

Directions

Add 0,5% K-Supply Aquacon II Water Conditioner to RO water. A water hardness of between 8 to 10°dH will be achieved when used as directed.

Read MSDS before using this product.

Directions for Use:

For details, please refer to the safety data sheet.

Specifications

Product name	K-Supply Aquacon II Water Conditioner by Prisco
Packaging	25-litre cuben
