

Clean Inker Roller Conventional DigiTech 700

Prisco

K-Supply

K-Supply Clean Inker Roller Conventional DigiTech 700 is a water miscible wash for automatic cleaning systems formulated for use on all brands of new and in-warranty press equipment requiring a Fogra certified wash. This product has been tested and proven safe for all press components.

Benefits

- Water emulsifiable – takes away paper dust and glazing during the wash-up
- Increases the ink-accepting capacity
- Extends the life of blankets and rollers
- ISEGA Certificate for Food Packaging printers
- Approved by Press manufactures

Directions

- For rollers, apply Clean Inker Roller Conventional DigiTech 700 to the roller train. Set the wash-up blade and apply an additional amount to flush ink residues from roller train. Reapply as needed. To de-lint and deglaze the rollers, add water to the wash while the press is running.
- For blankets, apply Clean Inker Roller Conventional DigiTech 700 to a rag and wipe the surface of blanket until clean. To enable the rag to glide more easily over the blanket surface, simply apply a small amount of water to the rag. This will also de-lint and de-glaze the blanket. Do not apply by hand while blanket is in motion.
- On automatic wash-up systems: follow the instructions of the Press manufacturer, and adjust, if necessary, time and quantity.

Read SDS before using this product.
