

K-Blanket Sericea

K-Supply

Description

The K-Blanket Sericea is produced using the most advanced production techniques and represents the next generation in blanket manufacturing. Its overall consistency and quality give a superior result with presses that use H-UV or H-UV-L.

This Sericea-blanket leads to a faster recovery on press, an improved smash resistance and reduced gauge loss. The compressible layer production is completely solvent free. The exceptional long life, improved production time and reduced down-time on press, make this blanket a great addition to press rooms everywhere.

Benefits

- Dedicated EPDM UV surface, specially designed to work effectively with H-UV and H-UV-L ink systems.
- Developed to minimize surface picking and back trapping.
- The buffed surface is designed to cope with a wide range of substrates without having to compromise on dot quality.
- The compressible layer provides maximum stability and rapid recovery for high speed jobs.
- K-Blankets are suitable for both H-UV and H-UV-L press types.

Specifications

Product name	K-Blanket Sericea
Surface	Rubber compound: For H-UV and H-UV-L systems Surface finish: Buffed Roughness (Ra): 1.0 µm Colour: Green
Construction	Nominal thickness: 1.95 mm
Physical properties	Thickness range: 1.93 - 1.98 mm Overall hardness (Shore A): 81° Micro hardness (Shore A): 60° Tensile strength at break: > 60 N/mm Elongation at 10 N/mm: < 1.5% Compressibility rating: Soft
